

Sub D1

in it for permitting skin to be drawn inwardly of it, and a connection tube formed in said
applicator, ^{56?} said tube communicating with said cavity;

a vacuum pump associated with said housing; and
a connection between said vacuum pump and [one of said head and] said
applicator to impart at least a partial vacuum in the cavity of the applicator so that
placement of the head on a human body results in the application of a force combination
of mechanical oscillation and suction, said connection including a suction line carried
externally of said drive cable, said suction line having a first end operatively connected to
said vacuum pump and a second end operatively attached to said connector tube.

A2

5. (Amended) The apparatus of claim 4 wherein said [valves] viles are
removably mounted to the apparatus.

Cancel Claim 8.

A3

9. (Amended) The apparatus of claim [8] 7 wherein said vacuum connection
is attached [as an] to said applicator by quick connect device.

Cancel Claim 10 - 14.

M(2)

15. (Amended) A therapy massage device comprising:

a housing;

a motor mounted to the housing;

a vacuum pump mounted to the housing;

a drive cable operatively connected to the motor;

a massage head operatively [drive] driven by the cable;
